

BreatheEZ^{PLUS} **Housewrap**

Strength. Protection. Value.

BreatheEZ™ Plus MPL (Microporous Low Perm) & MPH (Microporous High Perm) was developed specifically to meet today's demanding expectations for an energy-efficient and healthy living environment.

BreatheEZ™ Plus is a residential and commercial-grade building wrap that is a 16.5 mil microporous non-woven engineered fabric. BreatheEZ™ Plus sheds water and reduces air infiltration yet allows the transfer of moisture vapor to the outside, creating a healthier and more energy efficient structure.

Product Options

BreatheEZ™ Plus MPL building wrap is the best choice for severe weather protection, providing real-world resistance to moisture and is more surfactant-resistant than most building wrap materials.

BreatheEZ™ Plus MPH building wrap provides reliable weather protection for projects with high-perm moisture transfer requirements. In a market cluttered with house wraps, only BreatheEZ™ Plus offers the flexibility in choice of performance building wraps engineered for your specific requirements.

Uses

BreatheEZ™ Plus MPL & MPH commercial-grade building wraps protect against air infiltration and moisture behind all types of exterior siding including wood, composite panels, vinyl, stucco, brick, stone, masonry, metal and insulated sheathings.

Both BreatheEZ™ Plus MPL and BreatheEZ™ Plus MPH are UV-stabilized to resist excessive degradation when left exposed for 180 days protecting the building envelope during construction.

Features

Industry Leading Weather Protection: BreatheEZ™ Plus MPL & MPH building wraps excel by providing exceptional water and surfactant resistance to assure a dry wall cavity while limiting air movement within the wall cavity increasing energy efficiency and home comfort.

Breathe-ability Options: Match the performance of building wrap to your breathe-ability requirements with standard BreatheEZ™ Plus MPL building wrap or high-perm BreatheEZ™ Plus MPH building wrap. Only BreatheEZ™ Plus gives you the option.

Stable: BreatheEZ™ Plus MPL & MPH building wraps are treated to resist excessive degradation from normal exposure to ultraviolet light and may be left exposed for up to 180 days.

Easy Installation: Lightweight (16.5 mil) and durable material is translucent making locating studs, openings, and corners quick and easy. Familiar installation process is simple and efficient.

Meets Building Codes: Both BreatheEZ™ Plus MPL & MPH meet or exceed applicable building codes for weather resistant barriers and are a critical component for a healthy, energy-efficient building.

The Leader in Custom Print Advertising

KB Building Products is a leader in flexible custom printing. Our innovative printing process can handle custom logos of various sizes and color combinations in the industry's smallest quantities with rapid turn-around times. BreatheEZ™ Plus building wraps are ideal billboards for advertising your high-quality work to a targeted and interested audience. We specialize in multiple logo printing with your company name, logo, phone number and web address in large, easy-to-read type.

What better way to advertise than on the side of a building? People are naturally curious about construction and will readily see what is printed on the building wrap. Make a strong statement about your company by having logos and contact information printed on BreatheEZ™ Plus building wrap. Increase the power and value of your building envelope!

Call us at 804.744.7253 today to get your company logo and contact information on every new construction project!

Precautions

Warning: Protect from high heat or other ignition sources during shipment, storage and application.

Storage: Take care to protect BreatheEZ™ Plus building wrap from exposure to direct sunlight during storage. It is recommended that building wrap be stored inside or under cover.
